Hosted vs. Downloadable

actiTIME offers two installation options to meet any requirement. You can either download actiTIME on your local machine, or take advantage of our hosting service.

To help you make the right choice we compared both options:

	Hosted (SaaS)	Downloadable
Installation Process	Your copy of actiTIME is installed on our **server.** All installation and maintenance work is performed by us.	You need to download and install actiTIME on **your local Windows or Linux machine or corporate server.**
Security	Our engineers control security and availability of the system and protect your data by Firewall. **The service is available 99.9% of the time.** We also backup your data daily and secure access to actiTIME through the encrypted communication channel.	You need to secure actiTIME data by local Firewall and make regular database backups on your own.
Prices	Recurring monthly payment	One-time payment
Upgrades	Major product versions (actiTIME 2016, 2017, etc.) are released every year. We also add new functionality to actiTIME Hosted throughout the year.	Major product versions (actiTIME 2016, 2017, etc.) are released every year. Interim versions (2016.2, 2016.3, etc.) with extra features come out once or twice a year.
Upgrade Fee	**All upgrades are FREE** and installed automatically.	Upgrades to interim versions (2016.2, 2016.3, etc.) are FREE for the users who have major actiTIME version of the same year. All upgrades to the major version of actiTIME are fee-based.
System Requirements	The service is available from any device anywhere in the world. To get access to actiTIME you will just need one of the following browsers: Internet Explorer 8.0+, Mozilla Firefox 1.5+, Google Chrome, Safari.	Check for system requirements as they depend on the installation package you choose: www.actitime.com/administration-guide
Data Export	You will be able to export the data in .csv format as reports.	In addition to exporting the data in .csv format you will be able to access actiTIME database directly.
