

actiTIME

## What is the difference between Online and Self-Hosted options?

actiTIME offers two installation options to meet any requirement. You can either download actiTIME on your local machine, or take advantage of our hosting service.

To help you make the right choice we compared both options:

	actiTIME Online	actiTIME Self-Hosted
General Features		
Installation Type	Cloud on the Amazon servers	On-premise
Data location	North America/EU, depending on your requirements	Your internal server
System requirements	Browser only (recent versions of Chrome, Edge, Internet Explorer, Mozilla Firefox, Safari)	Windows/Unix <a href="#">See details</a>
Access	Anywhere, from any device	Within local network
Data export	CSV reports	CSV reports Direct access to the database
Data security	<ul style="list-style-type: none"><li>Daily data backups performed by our engineers</li><li>Secure access through encrypted communication channel</li><li>Service availability 99.9% of the time</li></ul>	You need to secure actiTIME data by local firewall and make regular database backups on your own
